

AGRICORE - 3rd Press Release

AGRICORE Presents scientific poster on Agricultural Economics at XVII EAAE Congress

[Rennes, 30/08/2023] - **AGRICORE** is proud to announce its active participation in the **XVII EAAE Congress** held in Rennes, France, from August 29 to September 1, 2023. The event, focused on agricultural economics, served as a platform to foster discussions on policies, strategies, investments, and forward-looking educational initiatives in the agricultural sector.

Under the theme “Connecting Science and Society,” the congress emphasized the vital role of research in creating a meaningful societal impact.

AGRICORE, represented by its partners from the **University of Parma**, presented a compelling poster titled “Assessment of CAP Generational Renewal Subsidies with ABM.” The primary objective was to evaluate the efficacy of Generational Renewal subsidies in encouraging young farmers to enter the agricultural industry. The assessment encompassed measuring economic viability and scrutinizing whether current Pillar 1 and 2 subsidies adequately address the financial and economic obstacles faced by young farmers when embarking on independent agricultural ventures.

Additionally, the event facilitated meaningful interactions between **AGRICORE** and its sister project, **MINDSTEP**, fostering collaboration in research endeavours and clustering activities.

The XVII EAAE Congress proved to be a valuable gathering, allowing **AGRICORE** to connect with fellow researchers and industry experts, exchange experiences, and glean profound insights. These insights will undoubtedly contribute to the advancement of agricultural economics and inspire innovative solutions for the future.
