1 Executive Summary

Il D6.4 consiste nel componente software denominato “Modulo di Simulazione”, sviluppato nell’ambito del progetto AGRICORE e che fa parte dell’infrastruttura generale di simulazione AGRICORE. Di conseguenza, il deliverable effettivo è il software prodotto. Tuttavia, l’obiettivo di questo documento è descrivere come è stato costruito il Modulo di Simulazione e come funziona, al fine di supportare il software stesso, che viene pubblicato come open source (come concordato per la maggior parte dei risultati del progetto AGRICORE).
