OF AGRICULTURE POLICIES**

D6.5 Integrated AGRICORE tool

Deliverable Number	D6.5
Lead Beneficiary	IDE
Authors	IDE
Work package	WP6
Delivery Date	M54
Dissemination Level	Public

www.agricore-project.eu

The Agricore project has received funding from the European Union's Horizon 2020 research and innovation programme under the Grant Agreement No. 816078

Document Information

Project title	Agent-based support tool for the development of agriculture policies
Project acronym	AGRICORE
Project call	H2020-RUR-04-2018-2019
Grant number	816078
Project duration	1.09.2019-31.8.2023 (48 months)

Version History

Version	Description	Organisation	Date
0.1	Deliverable ToC	IDE	05-feb-2024
0.2	Initial Content	IDE	18-feb-2024
0.3	Extended descriptions	IDE	26-mar-2024
0.4	Update to reflect software updates	IDE	24-jun-2024
1.0	Final version	IDE	11-sep-2024

Disclaimer

All the contributors to this deliverable declare that they:

- Are aware that plagiarism and/or literal utilisation (copy) of materials and texts from other Projects, works and deliverables must be avoided and may be subject to disciplinary actions against the related partners and/or the Project consortium by the EU.
- Confirm that all their individual contributions to this deliverable are genuine and their own work or the work of their teams working in the Project, except where is explicitly indicated otherwise.
- Have followed the required conventions in referencing the thoughts, ideas and texts made outside the Project.

1 Executive Summary

Il D6.5 consiste nel componente software denominato “AGRICORE Suite”, sviluppato nell’ambito del progetto AGRICORE, che comprende tutti gli elementi software realizzati al suo interno. Di conseguenza, il deliverable effettivo è il software prodotto. Tuttavia, questo documento si concentra sulla descrizione del processo di integrazione, sugli elementi che compongono la suite finale AGRICORE, nonché sul modo in cui funzionano e cooperano tra loro per supportare l’obiettivo finale della suite: la simulazione e l’analisi dell’evoluzione delle popolazioni sintetiche in un determinato contesto politico. I risultati effettivi (cioè il software sviluppato) vengono pubblicati come open source (come concordato per la maggior parte dei risultati del progetto AGRICORE).
